Projects

iPhone UI Clone

Feb 2025 - Mar 2025

- Built an iPhone lock screen clone using HTML, CSS, GSAP, Three.js and JavaScript
- Implemented real-time clock, swipe-to-unlock, and smooth UI animations
- Focused on responsive design and iOS-style interface
- Link: github.com/shubham-dev-tiwari/iPhone

Nexus – Movie Info Website

Jul 2024 - Sep 2024

- Built a responsive movie website using HTML, CSS, and JavaScript
- Integrated movie data dynamically using a public API (e.g., TMDB)
- Features include search functionality, movie details, and smooth UI animations
- Link: <https://github.com/shubham-dev-tiwari/Nexus>

Audiophile E-Commerce Website

Jun 2024 - Jul 2024

- Developed a multi-page e-commerce site using HTML, CSS, and JavaScript
- Built product pages, shopping cart, and responsive layouts
- Implemented modular components and clean UI with modern design principles
- Link: github.com/shubham-dev-tiwari/audiophile

Ashen Ascend-Ashes To Glory

Aug 2023 - Sep 2024

- Initiated the development of an adaptive AI adversary system for a video game, employed Deep Q Networks (DQN) and reinforcement learning techniques.
- Dark Souls inspired action combat game with an additional challenge where AI learns from player's play style and provide greater challenge in each iteration.
- Implemented using C++ 17, Unreal Engine 5, Behaviour Trees, UMG, Blueprints.
- Link: github.com/shubham-dev-tiwari/Ashen-Ascend

GO-Translate

Dec 2023 - Feb 2024

- CLI based Google Translator in Go Language.
- Used Cloud Translation Go API by google to perform translations using CLI.
- Link: github.com/shubham-dev-tiwari/Google-Translator-in-Go

Certifications

- **GO Programming Language:** Great Learning
